SUB 71. (Twice Amended) A method for manufacturing a semiconductor device
comprising:
the first step of forming a semiconductor film over a substrate;
the second step of etching the semiconductor film to remove contaminant
impurities on a surface of said semiconductor film by applying an etching solution while
spinning the substrate; and
the third step of forming a gate insulating film in contact with said
semiconductor film after said second step,
wherein said second and third steps are performed in sequence without
being exposed to air.
